

If you like LYSOL® I.C.™, you'll love these Sultan products...

LYSOL® I.C.™ Soap

Effective on germs, gentle on hands. 0.3% Triclosan formulation decreases the risk of cross contamination, while leaving hands smooth and clean.

Touch-less Soap Dispenser
Safe, clean and convenient... eliminates contact with contaminated surfaces.

THE ONLY LYSOL® FOR PROS.

A new study proves it: No LYSOL® product protects your practice better than LYSOL® I.C.™ Disinfectant Spray.

An independent, nonprofit products testing laboratory has found that the “everyday” LYSOL® spray you buy at the store does NOT pass all the testing requirements for killing viruses such as TB and poliovirus in whole human blood.*

LYSOL® I.C.™ Disinfectant Spray—the healthcare professional's LYSOL®—is the only one that passes all testing requirements, giving you the high-level protection you need. That's because LYSOL® I.C.™ Disinfectant Spray has a unique formula that contains 79% ethyl alcohol. It effectively kills more germs and viruses.*

Trust you are protecting your patients and employees with LYSOL® I.C.™ Disinfectant Spray, available only through your distributor—not stores.
