

MOM! ARE YOU SERIOUS?

PROTECTION SHOULD BE MORE SUBTLE.

With the HydrationStation™ from Haws, your patients – and their parents – won't be wrapped-up wondering if your water is safe for them to drink. With the new hygienic HydrationStation, featuring a touch-free design that eliminates the need for physical contact with the dispenser, your patients won't need to walk around like the bubble boy anymore. And you won't have to listen to them pop all those annoying little bubbles.

And to further safeguard you, the HydrationStation uses antimicrobially protected components to guard against the growth of mold and mildew.

For additional details on this exciting new product visit www.stayhydrated.com or call (888) 640-4297.
