

# The protection and performance you need during surgery.

Esteem® surgical gloves provide the comfort, protection and performance of natural rubber latex.

Cardinal Health offers six powder-free polyisoprene surgical glove solutions to meet the varying needs of surgical procedures today. Esteem® surgical gloves are made from synthetic polyisoprene, which has a chemical structure identical to natural rubber latex but without the proteins. This provides healthcare workers, with a known sensitivity or allergy to natural rubber latex, an alternative solution that performs like latex in terms of comfort, fit and feel. They can be worn stand-alone when a single layer of protection is preferred or paired with our colored underglove, Esteem® Blue with Neu-Thera® surgical gloves, when double-gloving.

*For more information, contact your Cardinal Health representative or call customer service at 800.964.5227.*
